# Fundamentals Of Corrosion And Forms (Environmentally-assisted cracking)

Prepared by

*Aya Mohamed El-sayed Ahmed Hegazy*

Under supervision of

*DR: Samir Abd-Elhady*

**FOURTH LEVEL**

**2016**

# *Acknowledgment*

Firstly thanks to Allah for enabling me to do this research and all my thanks and respect to my parents who encouraged me and supply me with all what I need and my uncle who help me a lot.

I wish to express my deep thanks and science gratitude to my supervisor

*DR: Samir Abd-Elhady*

For his support, valuable advice, helpful assistance, continuous encouragement and constructive criticism in reading, revising and preparing this research.

Also I would like to thank DR: Ibrahim Mohy; head of chemistry department Port-said University for his contributions.

Finally, all my thanks to everybody who gave me hand during this work; and grateful to all doctors and demonstrators who thought me during four year.

With my best wishes

*Aya Mohamed Hegazy*

# List of content

---

## **Chapter1: introduction**

1.1. Definition of Corrosion.....	1
1.2. CAUSES OF CORROSION.....	1
1.3. CONSEQUENCES (EFFECTS) OF CORROSION.....	2
1.4 .Corrosion prevention.....	5
1.5 .Importance of Corrosion Studies.....	6

## **Chapter2: Corrosion Mechanisms**

2.1. Classification of Corrosion.....	7
2.2. General theory of corrosion.....	9
2.3 .Electrochemical Theory.....	11
2.4. Electrochemical Reactions.....	13
2.5 .Types Of Electrochemical Corrosion .....	14
2.6. Polarizations.....	16
2.6.1. Over potential.....	16
2.6.2. Anodic and Cathodic Polarization.....	20
2.6.3. Measuring Polarization.....	21
2.6.4. Anodic Polarization.....	22
2.7. Factors influencing corrosion rate.....	22
2.8 .Corrosion Rate Expressions.....	25

## **Chapter3: Forms of corrosion (Environmentally assisted cracking)**

3.1. General corrosion (uniform corrosion.....	28
3.2. Localized Corrosion (corrosion at isolated areas in the anode).....	29

<b>3.2.1. Galvanic Corrosion.....</b>	<b>29</b>
<b>3.2.2. Pitting corrosion.....</b>	<b>30</b>
<b>3.2.3. Crevice corrosion.....</b>	<b>32</b>
<b>3.2.4. Filiform corrosion.....</b>	<b>33</b>
<b>3.3. Intergranular corrosion.....</b>	<b>33</b>
<b>3.4.Erosion corrosion, including cavitation ,erosion and fretting corrosion.....</b>	<b>35</b>
<b>3.5. Dealloying.....</b>	<b>36</b>
<b>3.6.Environmentally assisted cracking.....</b>	<b>37</b>
<b>3.6.1.Hydrogen-Assisted Cracking.....</b>	<b>37</b>
<b>3.6.1.1. Hydrogen sources.....</b>	<b>38</b>
<b>3.6.1.2. Hydrogen Damage.....</b>	<b>39</b>
<b>3.6.1.4. Types of Hydrogen Damage.....</b>	<b>40</b>
<b>3.6.2. Stress Corrosion Cracking (SCC).....</b>	<b>46</b>
<b>3.6.2.1.Types of stress corrosion cracking.....</b>	<b>47</b>
<b>3.6.2.3.Source of tensile stress.....</b>	<b>47</b>
<b>3.6.2.4.Mechanism of SCC.....</b>	<b>48</b>
<b>3.6.2.5. Factors Affecting Stress Corrosion Cracking.....</b>	<b>51</b>
<b>3.6.2.6. Environment: Aqueous Chloride.....</b>	<b>52</b>
<b>3.6.2.7. Methods to Control SCC.....</b>	<b>53</b>
<b>3.6.3.Corrosion fatigue.....</b>	<b>53</b>
<b>3.6.3.1. Apperance.....</b>	<b>54</b>
<b>3.6.3.2.Mechanism of corrosion fatigue.....</b>	<b>54</b>
<b>3.6.3.3 .Effect of corrosion on S-N diagram.....</b>	<b>56</b>
<b>3.6.3.4. Factors Affecting Corrosion Fatigue.....</b>	<b>56</b>
<b>3.6.3.5.preventing corrosion fatigue.....</b>	<b>57</b>
<b>3. 7.COMPARISON OF SCC, CF, AND HAC.....</b>	<b>57</b>
