Port Said University

Hult Prize for food security

The Entrepreneurship, Innovation and Sustainability Unit at the Faculty of Engineering, Port Said University, was honored to arbitrate the Hult prize Sinai University competition in the Faculty of Engineering, Port Said University. Seven entrepreneurial projects working to achieve one goal, eliminating hunger as one of the sustainable development goals, participated in the competition.

The Wandering Minds Project, which works to solve the problems of waste accumulation and the lack of good food for the homeless at the same time, won first place and ascended to the international competition.

The Volt in food project, which works to provide suitable meals for some sick conditions that need special foods, such as the elderly, people with determination and autism, won second place and ascended to the regional competition.

The Green Project, which works to integrate with the African community in order to exploit the fertility of African soil and provide organic food at the lowest possible cost, won the third place and ascended to the regional competition.
